

FOR IMMEDIATE RELEASE

Solectria Renewables LLC signs distribution agreement with Matrix Energy, Quebec Canada

LAWRENCE, MA, August 25, 2009 – Solectria Renewables LLC, a manufacturer of grid-tied photovoltaic inverters and auxiliary components, announced today that it has signed a distribution agreement with Matrix Energy Inc to distribute and market the company's grid-tied inverters and accessories to the Canadian market.

Solectria Renewables CEO James Worden said, "This is the first step in Solectria's plan to enter the emerging Canadian market. Our factory is here in Massachusetts and we believe we can service the Canadian market effectively with the added collaboration of Matrix Energy. As their distribution, sales, marketing and business teams are already in place, we can expect to deploy our equipment today. With the pending launch of the Ontario feed-in tariff program we expect a lot of business coming from our northern neighbors."

Says Brian Wilkinson, President of Matrix Energy Inc., "We are truly excited about this opportunity. Solectria's product quality is unrivaled in the industry and their wide product range will enable our dealer and installer network to address all projects."

"The addition of the Solectria line of grid-tied inverters compliments our ability to deliver complete PV systems to residential, commercial and government end users", says Andrew Wilkins, Account Representative at Matrix Energy; "also their system monitoring package is simple and user friendly".

About Matrix Energy Inc.: Since 1985 Matrix Energy Inc. has delivered reputable, renewable energy products and services to its North American dealer and installer network. Matrix Energy offers solar integrated electric systems for new and existing buildings to reduce their dependency on conventional energy sources. Matrix is committed to delivering environmentally friendly, energy efficient products and services that address client needs and Greenhouse Gas reductions.

Solectria Renewables, LLC, of Lawrence, Massachusetts is a leader in the development and manufacturing of a wide range of inverters for renewable power applications including 1.8kW to 500kW grid tied PV inverters for systems from 1kW to multi MegaWatts. Solectria Renewables has a 20-year background in inverters and other electronic power systems for harsh environments. All Solectria Renewables' three-phase inverters, string combiners, and web-based monitoring components qualify as Made in the USA.
